There are ongoing improvements especially for the CFT model that are being worked on but they will not be submitted with the appendices

Thanks, Rob.

Have there been any significant changes since submission of the RI/FS, particularly to the CFT model? If so, will revised code, input and output files be submitted with (or prior to?) the appendices associated with Section 7 of the RI?

EPA has the modeling codes, input and output files that were used in the 17-mi RI and FS.

And a related question, does the RI reflect the information we currently have or an updated version?

Hi Rob,

Has the model code that we have, including the inputs and outputs, changed significantly from the version we have? If so, could you please send us revised information prior to submission of the appendices to Section 7 of the RI?

Thanks,
Stephanie
